Thursday Island

Re-powered and set to go!

Welcome back MV Strait Magic! Firstly a big esso to all our valued clients for your co-operation while our smaller capacity ferry Wings serviced the Thursday Island / Seisia route.

Purpose built in Cairns, MV Strait Magic remains the only Torres Strait based passenger ferry combining such a high level of comfort, speed and capacity. Operations Manager Capt. Matthew Connor had a comprehensive list of specifications when considering re-powering this vessel. The QSM11 by Cummins offered the very best option.

Cummins Diesel is in the vanguard of supporting the environment, earning the first EPA Tier 2/IMO emission standards certification for this new wave of diesel marine power. The QSM11 was designed and built around fuel systems that provide better power-to-weight ratio, cleaner starting, less noise and virtual elimination of smoke and odour traditionally associated with diesel engines.

MV Strait Magic now leads the way in the Torres Strait maritime industry as a low emissions ferry. Special thanks to the businesses and individuals responsible for the success of this refit. Ansell Engineering, Wayne Mason, Brett Jarmin, Clive Connor, George Dorante, Daniel & Rhonda Takai, Mario Sabatino, Anthony Garnier, Valma and Bill, Ross McKenzie and Norship. Rob & Steve on TI

"...don't trip on the fish were our guides first words as she warmly welcomed us off the ferry from Seisia. Our special thanks to you Lesley and your wonderful crew for making Old T.I. a highlight of our Cape York trip."

George & Meg-Brisbane

"Sue, I have undertaken tours all over the world and your expert guidance and love of Torres Strait shines through in your presentation. Thank you for such a memorable day on Thursday Island." Jeffery and Pam N.Z.

Blue Winged Kookaburra, often spotted on tour. Ask your guide to imitate its loud screaming cackle! They're quite convincing!

ENVIRO LOOS TOO

The MV Strait Magic's 6 week refit in Cairns, also included the installation of an environmentally compliant onboard treatment plant.

The system is connected to electric macerating pumps. Passengers co-operation in placing only toilet paper in the toilet is vital as anything else will damage the system.

Peddells, touring T.I. for over a quarter of a century. Time flies when you're having fun and show casing our island home to visitors, we think, has to be one of the best jobs in the world. Standing on Green Hill surrounded by azure Torres Strait waters and sharing your day with visitors keen to discover our islands unique cultural heritage and maritime history—these tours are our passion and pleasure.

Ongoing research and development continues to improve the tour and enrich the Torres Strait experience. Incorporating historical footage from our family archives and with special guest presenters, Peddells documentary DVD Thursday Island via Cape York RRP \$12 will soon be offered as a complimentary souvenir onboard the TI Bus Tour.
